- Screenshot of each member's contributions throughout the semester from GitHub
- We didn't use GitHub for project distribution.**

Due to the nature of unity projects and folders, it made more sense for us to utilize Google Drive and Dropbox for file management than GitHub, thus we could all "check out" the entire project and then re-upload it to google drive as a new version after making changes. As such we do not have screenshots of commits, but all members contributed graphics and code to the Dropbox, although this is impossible to prove.

The link below will allow you to download the final project.
